## WORK EXPERIENCE

### Reascearch And Develop ment Cell, S.A.K.E.C                2024 - Present

managed Instagram effectively for one and a half years, supervising all aspects of social media operations, such as scheduling, branding, engagement, and content production. maintaining the position while making sure it keeps growing, expands its reach, and has a strong online presence.

### Student Sports Club, S.A.K.E.C                2025 - Present

For two months, I oversaw the Student Sports Club's Instagram and social media accounts, producing interesting content, scheduling posts, and assisting with the club's online presence during important occasions and activities.

### MaharajaFlapWheel, Freelancing                2025 - Present

As a freelance developer, I am in charge of the entire development of the manufacturing company's ERP management system by using Next.js, React, TypeScript, and Tailwind CSS. I am creating the essential features like the dashboard, order flow, inventory, user roles, and master data along with the back-end for the most part, and at the same time, user authentication is being taken care of for a secure app, and the UI is clean and production-ready.

## EDUCATION

## PROJECTS

**Maharaj Flap Wheel – ERP Management System (Freelancing Project)**
Built a complete ERP web application for a manufacturing company using Next.js, React, TypeScript, and Tailwind CSS. Implemented dashboards, order creation & tracking, stock management, master data handling, and transport/company management. Integrated authentication, session persistence, and role-based access control for secure admin–staff operations.

**SAKEC ACM Student Chapter Website**
Developed a modern, production-ready website for the SAKEC ACM Student Chapter using Next.js 14, TypeScript, Tailwind CSS, and Supabase. Delivered smooth GSAP & Framer Motion animations, Lenis smooth scrolling, responsive UI, dark theme, and interactive components like 3D cards and parallax effects. Built complete pages including Home, About, Team, Events, Blog, Gallery, Contact, and Why Join.

**Beyond Hunger – Food Donation Platform**
Created a full-featured web platform to support food donation and community service initiatives. Implemented food donation workflows, volunteer sign-ups, marketplace for sharing/requesting food, Bhandara event management, money donation modules, and an admin dashboard for seamless backend control.
